Get into the fast lane!
## There are many reasons

... to use the WSCAD SUITE for your electrical engineering. Here are 10 of them:

1

Ubiquituous consistency in engineering data
The WSCAD SUITE is the first integrated and comprehensive CAD/CAE solution for electrical engineering, cabinet engineering, process and fluid technology, building automation and electrical installation. No matter which discipline you work in – the replacement of a component in one schematic is reflected and immediately completed in all other schematics. This saves time and improves quality.

2

Over 1.3 million parts in wscaduniverse.com
The world's largest library for electrical CAD data: 1.3 million parts and symbols from over 210 manufacturers, for WSCAD, Eplan* and 3D CAD. Awarded with the golden "e" as the "Best Database for Parts and Symbols", wscaduniverse.com offers fast search and filter functions and can be accessed free of charge!

3

High functionality
WSCAD SUITE is a modular an scalable software. It offers a vast range of functions: from simple ten-page jobs to mega projects with structure identifiers, standards-compliant design in accordance with IEC 81346, detailed user management and much, much more. The documentation can be delivered as intelligent PDFs to be read anywhere without a special viewer. With a simple click on intelligent measuring points in a process schematics, service technicians can immediately switch to the fluid plan or other schematics.

Electrical Engineering with WSCAD

*35,000 users
28 years experience*

When will you start working with the WSCAD SUITE?

4 Outstanding price-performance ratio

The WSCAD solution is up to four times cheaper than comparable solutions on the market. It was awarded with the golden "e" for the "Best Price/Performance Ratio", so you will experience budget relief both in terms of procurement costs and annual maintenance costs.

5 Fast, intuitive and easy to use

WSCAD is designed for speed: the logical structure and intuitive user interface were awarded with the golden "e" for the "Best User Experience" Thanks to the easy operation, you accomplish many tasks fast, even if you only work sporadically with WSCAD.

6 Data import from other electrical CAD systems

With WSCAD, you can effortlessly engineer and manufacture cabinets based on data from other electrical CAD systems. It includes the labeling and manufacturing of cables and wire sets and the transfer of the data to NC machines from Kiesling*/Rittal*, Komax* or Pentair*/Steinhauer*. All functions are part of the software and do not involve any additional license costs.

7 Easy integration through numerous interfaces

WSCAD's product strategy is complemented by mechanisms for speeding up processes and for openness to other systems. The software provides many efficient interfaces to PLM and ERP systems. WSCAD can integrate with your existing IT and manufacturing systems.

8 Finish your projects on time and on budget

Structuring, standardizing, reusing, generating and configuring: with this five-stage methodology for engineering automation, you can shorten your engineering and design time from several weeks to just a few minutes! So you have more time available for new projects.

9 Engineering and IT consulting from WSCAD Global Business Services

With closely coordinated services, WSCAD can assist you with a variety of services: from individual training through digitization (converting schematics on paper into electrical CAD data, converting between various electrical CAD formats), all the way down to process optimization and supplier guidelines. With an Engineering Checkup we analyze you current process, make concrete recommendations and lay the foundation for a professional and smooth transition to the WSCAD SUITE - regardless of which electrical CAD system you have been working with so far.

10 Excellent maintenance and support

We are here for you! Forget call centers and enjoy our excellent support: quick, competent and very personal. Awarded with the golden "e" for the "Best E-CAD Hotline & Support", we offer three three different maintenance levels for your individual needs.

Curious? Why not just try it for yourself now? Download our demo software or call us at +49 (0)8131 3627-98.

We look forward to hearing from you!
